Extreme Heat Health Alert – Monday 18 July and Tuesday 19 July

Dear Parents/Carers

The Met Office have issued a level 3 heat health alert for next Monday and Tuesday next week. Please consider carefully any risks to your child in travelling to school on the buses and their ability to tolerate these high heat levels. You may have serious health concerns about your child coming into school on transport, or their ability to be in school during this short heatwave. Please inform us if you decide not to send your child to school for health reasons.

At school we will

- Keep the children as cool as possible and avoid sending them out to play if it is too hot
- Keep the children well hydrated – each class has access to plenty of water
- Alert you immediately if we have any health concerns about your child

Please can I remind you to apply sun cream before your child comes to school and to ensure your child has a suitable sun hat/cap.

Kind regards

Paul Adair
Headteacher
